VIBGYOR ACE

NEWSLETTER

Admissions. Discovery. Future Readiness.

July at VIBGYOR ACE marked the commencement of the admissions cycle for the 2027–28 academic year. From aligning teams for the upcoming admissions journey to giving students a first-hand experience of the ACE learning approach, the month focused on building awareness, discovering potential, and enabling informed choices for the road ahead.

Admissions 2027–28 | Aligning Teams for the Journey

Preparing for Impact

The commencement of the 2027–28 admissions cycle began with the ACE Programme Induction 2026, with in-person sessions conducted for the Bangalore Zone and virtual induction programmes held for the Mumbai and Pune Zones. These sessions were designed to align the teams with the core aspects of the ACE Programme, execution strategies, and on-ground impact.

The induction brought together key discussions on the ACE Coordinator role, programme execution, KRA alignment, business targets, CRM and administrative processes, professional etiquette, and team-building activities. Through practical simulations, role plays, and interactive discussions, the sessions equipped coordinators with the clarity and confidence needed to drive the upcoming admissions cycle effectively.

Experience the ACE Way | Demo Sessions Across Locations

Learning Beyond the Traditional Classroom

Demo sessions were conducted across all locations to give students a first-hand experience of the ACE way of learning before they become a part of the programme.

Designed to go beyond traditional classroom teaching, these sessions made learning interactive, engaging, and enjoyable. Experienced faculty from Mathematics, Physics, Chemistry, and Biology engaged students through discussions, activities, and active participation.

Students were encouraged to think, ask questions, and engage with concepts rather than simply listen. These sessions offered students a glimpse into ACE's concept-based teaching approach, interactive classrooms, and passionate faculty.

More than just demonstrations, the sessions helped spark curiosity, build confidence, and create excitement for the ACE learning experience.

Discovering Potential | ACE Psychometric Test

Understanding Strengths. Enabling Better Choices.

The ACE Psychometric Test (APT) was conducted across various locations to help students gain a deeper understanding of their strengths, interests, aptitude, and learning potential.

The 75-minute assessment evaluates key areas such as aptitude, mathematical reasoning, problem-solving abilities, and other essential skills that contribute to academic success.

Beyond being an assessment, APT provides meaningful insights into a student's natural abilities, learning style, personality, and areas of interest. These insights help students make informed decisions about their academic journey and identify the stream or career path that best aligns with their potential.

By helping students understand their unique strengths early, APT serves as an important first step towards making informed academic and career choices with greater clarity and confidence.

VIBGYOR ACE Orientation Programme

Unlocking Opportunities and Shaping Futures

The VIBGYOR ACE Orientation Programme was conducted across various locations to showcase the numerous benefits of the comprehensive ACE Integrated Programme.

These informative sessions provided students and parents with insights into how the programme is designed to equip students with essential skills, explore diverse career pathways, and access a wide range of academic and extracurricular opportunities.

Through detailed discussions, families were introduced to the programme's offerings, including personalised mentoring, skill development modules, and industry exposure initiatives.

The VIBGYOR ACE Programme is designed to nurture well-rounded individuals, helping students build the skills, confidence, and clarity required to navigate the dynamic world ahead and shape successful futures.
